

How the COVID SCAM Worked

- ***All previous pandemic preparedness planning went straight out of the window in 2020!***
- **The official Covid statistics 100% depended on a PCR test that many (including the WHO) admit presents a high percentage of false positives if applied within a healthy population (no test is 100% accurate, diagnosis must be by a competent clinician).**

if you test healthy people, all positive results will be false!

- **Deaths were routinely assigned to Covid merely on the basis of a positive test within the preceding 28 days.**
- Flu “somehow” disappeared.
- The average age of “Covid” deaths was around the expected life-span - **the elderly were dying as normal.**
- Covid deaths tailed off in March April May 2020 as expected for any respiratory illness. **The panic should have ended there, but the media segued seamlessly into reporting “cases” - ie: false positives from the tests** – and the mantra switched to “*Testing! Testing! Testing!*” in the population at large.
- In July Mr Johnson introduced masking – despite that we had all survived into high summer without any rise in excess deaths.
- Winter 2021 saw lockdowns, novel vaccines for “Emergency use only”, & **a full-blown media fear campaign** that if we didn’t get jabbed we were “all gonna die!” ... and finally ... the **excess deaths from all causes** began to rise, and continued to rise.
- And incidentally ... a test for the “novel Covid-19” was patented in the Netherlands in June **2016** for one Richard A Rothschild (as far as I know, it was not used).

These are simply the facts, to the best of my knowledge and belief.

Conclusions?

- **The Covid statistics were manufactured in contravention of all good practice.**
- People are still suffering and dying from the adverse effects of the jabs – but no authority will admit it.
- There was never an excuse for jabbing kids who were at no risk from the alleged disease, but they did.
- And to conclude - Where is now the emergency that still enables these so-called emergency use vaccines to be offered to an incautious public?
